Specification sheet

Asteria

Wall lamp

Crafted with great attention to detail, Asteria wall lamp offers the choice to tailor the lighting experience to each unique space. The Asteria wall lamp is dimmable, controlled by a discreet button on the lamp's screen. These features allow for effortless adjustment of the lighting to suit any occasion, whether it's a serene moment of bedtime reading, illuminating a corner for a cosy reading nook, or creating a welcoming embrace in the hallway.

For even greater versatility, Asteria wall lamp long can move from side to side, adding enhanced functionality while maintaining its graceful presence.

Available in a range of carefully selected colours, the Asteria wall lamp integrates seamlessly with any décor, adding a touch of refined elegance to an environment. It is available in both a hard-wired and a non-hardwired version. In the hard-wired version, the lamp is mounted directly onto the wall's electrical outlet, with otherwise visible wiring hidden inside the wall.

Asteria wall lamp can be hardwired directly without the metal casing included in our hardwired add-on. However, the driver provided with the add-on must still be used and embedded in the wall rather than housed in the metal casing. This method allows for a flush installation, keeping the fixture as close to the wall as our standard setup with the pre-installed cord and plug. Please note that this process has specific technical requirements and must be carried out by a certified professional to ensure a safe and proper installation.

Product type: Wall lamp for indoor use

Designed by: Soren Ravn Christensen

Certified
